DOCUMENT RESUME

ED 219 588	CE 033 302
TITLE	Vocational Education Research Report on Employer Follow-up, 1979-80 Survey.
INSTITUTION	Iowa State Dept. of Public Instruction, Des Moines. Div. of Career Education.
REPORT NO	ISDPI-CE-80-R1
PUB DATE	80
NOTE	238p.
EDRS PRICE	MF01/PC10 Plus Postage.
DESCRIPTORS	Educational Research; *Employer Attitudes; *Followup Studies; High School Graduates; Job Performance; Outcomes of Education; *Personnel Evaluation; *Program Effectiveness; State Surveys; *Vocational Education; Young Adults
IDENTIFIERS	*Iowa

ABSTRACT

This report offers a brief narrative and extensive data tables on an Iowa survey of employers of students who had completed or left preparatory vocational education programs during 1977-78 and became employed in the occupations for which trained or a related occupation. The narrative first discusses procedures, then describes some results shown in four data tables concerning various demographic and descriptive information statewide about the former students and their programs and preparation and current performance of vocationally prepared employees. Table 5 shows the statewide vocational training evaluation by demographic and program variables. Tables 6 and 7 show these characteristics for secondary and merged area school respectively. Table 8 shows the distribution of responses according to sex of employees, number of months employed, and the present employment status by each program taxonomy number for secondary schools. It also displays the responses to the evaluation items by program taxonomy number for secondary schools. Table 9 shows the same information for merged area schools. Appendixes include the school administration survey package, the employer survey package, and listing of Department of Education Vocational Education Programs. (YLB)

ERRATA 234

INTRODUCTION

The need for information from the employer's perspective, relative to the adequacy of vocational education training programs in providing potential employees to meet employer needs, has been recognized for some time. Employer follow-up data would complement data from student follow-up studies, i.e., surveys directed toward former students of preparatory vocational education programs to determine whether they are employed in the occupation for which they were trained.

The Federal mandate for follow-up activities is specified in Section 112 (b)(1)(B) of the Vocational Education Act as amended by Public Law 94-482, which calls for an evaluation of each state program according to the extent to which program completers and leavers are considered by their employers to be well trained and prepared for employment. The National Center for Education Statistics has included Employer Follow-up reporting as a component in the annual Vocational Education Data System (VEDS). While responses to the Employer Follow-up survey are voluntary, the State is mandated to conduct these follow-up activities and submit the Employer Follow-up Report.

Due to the recognized need for follow-up data, a pilot project was initiated by the Iowa Department of Public Instruction (DPI) in the spring of 1977 to ascertain the feasibility of gathering employer supplied information which might then be analyzed to provide a more total picture of the adequacy of vocational education programs. The study was limited to three areas in Iowa. The design of that study provided for surveying a sample of the employers of students by the interviewing process.

The first full scale Employer Follow-up Survey was conducted during 1978-79. The survey which collected information relative to the students who completed vocational preparatory programs during 1976-77, deviated in three major respects from the pilot study. The survey was statewide instead of being confined to three areas of the state. The identified population was surveyed rather than a sample of the population. Data were collected primarily by mail rather than personal interview. There were two phases involved in the project. Phase 1 required the development of the list of employers of vocational program completers. Phase 2 concentrated on surveying the employers identified in Phase 1. Phase 1 was conducted by the Department of Public Instruction. Phase 2 was conducted through a contract developed as a result of a bid solicitation.

The statewide results of this survey were reported by the Department of Public Instruction in Report On Employer Follow-up - 1978-79 Survey. In addition, each participating secondary and postsecondary school received tabulations of localized data pertinent to its respective agency for agency feedback as well as statewide information.

The 1979-80 Employer Follow-up Survey was expanded to include surveying employers of program leavers as well as program completers. Data collected pertained to employers of students who completed or withdrew from preparatory vocational training programs during 1977-78 and subsequently became employed in a training related occupation.

METHOD

Subjects. The subjects for phase 1 consisted of approximately 343 secondary school and 14 merged area school administrators who participated in the Guidance Services Section, Iowa Department of Public Instruction, Career Education Preparatory Student Follow-up Survey and had students who had completed or left preparatory vocational education programs during the 1977-78 school year and became employed in the occupation for which trained or a related occupation. The subjects for phase 2 consisted of 6,553 present or former employers of the 8,258 students who were reported to have left or completed preparatory vocational education programs related to their employment during 1977-78.

Materials. The materials consisted of a survey form and coverletter for phase 1 and phase 2. Phase 1 materials are referred to as the school administration package (see Appendix A). Phase 2 materials are referred to as the employer package (see Appendix B).

Procedure. Phase 1 developing a roster of students by student name, program completed, and employer, involved three steps: orienting the administrator, obtaining the name of a contact person, and conducting the school survey for Employer Follow-up roster information.

On June 27, 1979 letters were mailed to secondary school and merged area school administrators to inform them of plans to conduct the survey and to obtain the names of contact persons. A follow-up mailing to nonresponders was completed by August 1, 1978.

On September 6, 1978 each merged area school and secondary school contact person was mailed the school administration package. Each contact person was requested to provide student names and program completion status as well as the employers' names, addresses, and telephone numbers for those 1977-78 preparatory vocational training program completers and leavers who became employed in a training related occupation. This information was requested by vocational program number and program characteristic codes (which would be used to identify simulated, jointly administered, and cooperative vocational training programs). A second mailing was made to schools which had not responded on October 5, 1979 followed by telephoning nonresponders on October 18, 1979. Responses were received from 97.9% of the 343 secondary schools contacted and from 93.3% of the 15 merged area schools contacted. The lists were screened by Department of Public Instruction personnel in order to edit the data in terms of former students employed in a training related occupation and employer names, addresses, and telephone numbers. Employers were unduplicated within each school district and merged area school. By the conclusion of phase 1 the number of unduplicated employers was estimated at 6,553 for the 8,258 applicable students.

Phase 2 involved surveying the employers identified in phase 1. Central Surveys, Incorporated of Shenandoah, Iowa, conducted the survey of employers between November 30, 1979 and May 1, 1980.

In mid-December 1979 the vendor was supplied with the data lists collected from participating merged area schools and secondary schools during phase 1. Identification numbers, data format, report formats, and computer programs were developed for processing and tabulating the data. The vendor addressed envelopes, via computerized gum labels, printed the coverletters and questionnaires, and mailed the survey materials February 13, 1980. A second mailing to nonresponders was conducted February 29, 1980, followed by telephoning nonresponders.

The returned surveys were reviewed by the vendor in order to assimilate written information which was then computerized by program taxonomy number and used in the report of comments. In some instances the responder was telephoned in order to acquire further clarification. The data were further processed by data entry and subsequent editing. Surveys were processed through May 25, 1980. After the data were edited, a file was developed, and tabulations were made. Phase 2 of the project was completed on May 1, 1980.

RESULTS AND DISCUSSION

A total of 7,604 or 92.1% of the survey questionnaires pertaining to 1977-78 vocational program completers or leavers employed in the occupation in which trained or related field, were returned at project completion. The first and second mailings resulted in 76.7% returned surveys. Telephoning yielded an additional 15.4% responses.

Usable responses to the survey provided information about 4,727 or 57.2% of these former students. The number and percent of usable responses by institution type (secondary or merged area school) are listed below.

Institution	Initial Number of Students Listed	Usable Responses	Percent of Usable Responses
Total	8,258	4,727	57.2%
Merged Area Schools	4,455	2,879	64.6%
Secondary Schools	3,803	1,848	48.6%

The following table summarizes the reasons for missing information from 3,531 potential respondents:

Distribution of Unusable Questionnaires

Reasons Not Used	Total	Merged Area Schools	Secondary Schools
Total	3,531	1,536	1,955
Not deliverable	156	108	48
*Refused to participate	455	339	116
Job unrelated to training	833	216	617
Student unknown to employer	795	406	389
Co-op student only, not employed after completion of training	508	63	445
Employed for too short of time to rate	136	93	43
Miscellaneous, other reasons - no longer in business, non-working telephone number, deceased, etc.	285	150	135
Contacted by telephone and promised to mail completed questionnaire but questionnaire not recieved	310	182	128

---

*This figure includes 59 responders who refused to participate by telephone.

Table 1 shows various demographic and descriptive information statewide about the former students and their programs for whom employers returned questionnaires. These same characteristics are summarized for employees prepared at secondary schools and merged area schools.

The following characteristics of employers and employees were identified by the survey:

(1) About forty-eight (47.6) percent of the responses from employers pertained to male students compared with 52.4 percent for female students.
(2) More than half (53.4%) of the former students were currently employed.

Employment Status	Percent
Currently employed	53.4%
Terminated (Fired)	4.6%
Voluntarily left (Resigned)	28.7%
Other	3.3%

(3) About half (50.2%) of the students found employment with small employers (25 or fewer full-time employees).
(4) Nearly three-fifths (57.5) of the students were employed for more than one year by the reporting employer.

Table 2, page 8 shows the percent of employer responses statewide to questions concerning preparation and current performance of vocationally prepared employees. This information is presented for employees prepared at secondary schools in Table 3, page 9 and those from merged area schools in Table 4, page 10.

In terms of vocational training evaluation each of three factors were rated in addition to computing an overall rating. For technical knowledge 77.2% of the responses indicated a very good or good rating while poor and very poor made up 3.7% of the responses. Almost 77% of the responses categorized work attitudes as very good or good compared with 6.6% rating work attitudes as poor or very poor. Work quality was viewed as good to very good according to 76.9% of the responses compared to 5.0% responses indicating poor to very poor. Overall, 77.0% of the responses evaluated training of workers as good compared to 4.3% responses rating overall training as poor to very poor.

In terms of the relative preparation of vocationally prepared employees with non-vocationally prepared employees in similar positions, 47% of the vocationally prepared employees, according to the responses, were considered to be better prepared for similar positions while only 4.5% were considered to be less prepared.

TABLE 1

PERCENT OF STATEWIDE, SECONDARY SCHOOL, AND MERGED AREA SCHOOL EMPLOYER RESPONSES BY DESCRIPTIVE CATEGORIES

	Percent Response		
	Statewide	Secondary School	Merged Area School
Completion Status:			
100% completion	94.6	92.9	95.8
More than 50%	1.7	3.0	0.9
50% or less	2.0	2.8	1.5
Unknown	1.6	1.3	1.8
Program Type:			
Simulated	43.4	79.4	20.3
Co-op	56.5	20.3	79.7
Other	0.1	0.3	0.0
Length of Employment:			
1 to 6 months	20.5	28.3	15.6
7 to 12	22.0	26.8	18.9
13 to 18	16.2	14.1	17.6
19 to 24	22.7	19.1	25.0
25 to 30	7.5	2.6	10.7
31 months or more	11.0	9.0	12.3
Employment Status:			
Currently employed	53.4	49.5	55.9
Discharged	4.6	4.1	5.0
Quit voluntarily	38.7	42.3	36.3
Other	3.3	4.2	2.8
Number of Employees:			
Under 6	23.0	27.7	20.1
6 to 25	27.2	31.8	24.3
26 to 100	20.4	21.0	20.0
101 to 500	13.8	9.1	16.9
501 or more	10.7	5.9	13.9
Not stated	4.8	4.6	4.9
Sex:			
Male	47.6	52.9	44.3
Female	52.4	47.1	55.7

TABLE 2

PERCENT OF STATEWIDE EMPLOYER RESPONSES TO PREPARATION AND CURRENT PERFORMANCE OF VOCATIONALLY TRAINED EMPLOYEES

	Vocational Training Evaluation					
	Very Good	Good	Neutral	Poor	Very Poor	No Answer
Technical knowledge	22.0	55.2	17.2	3.2	.5	1.9
Work attitude	34.1	42.7	14.6	5.4	1.2	2.1
Work quality	29.0	47.9	15.9	4.1	.9	2.1
Over-all rating	23.9	53.1	16.7	3.7	.6	1.9

	Comparison of Vocationally Trained Employees With Non-Vocationally Trained Employees in Similar Positions			
	No Basis for Comparison	Vocationally Trained Better Prepared	Both About Same	Vocationlly Trained Less Prepared
Relative preparation	29.8	47.0	18.8	4.5

	Current Performance					
	Out-standing	Above Expected	Minimally Meets Expected	Below Expected	Unsatis-factory	Not Appli-cable
Quality of work	12.6	49.7	30.7	5.1	1.7	.3
Quantity of work	11.6	45.5	33.3	6.8	2.1	.8

Quality of work	11.9	49.4	30.9	5.3	2.2	.3
Quantity of work	11.3	43.8	34.2	7.3	2.6	.9
Job skills	10.6	47.3	33.3	5.2	1.8	1.8
Technical knowledge	10.9	48.2	31.1	5.9	1.8	2.0
Work attendance	31.8	40.0	20.5	5.0	2.2	.5
Punctuality	32.0	39.7	21.8	4.2	1.9	.4
Compliance with policies, rules, practices	23.8	43.3	25.7	4.1	1.6	1.6
Willingness to accept responsibility	23.6	40.2	25.6	7.1	2.2	1.4
Ability to work with minimal supervision	19.9	41.3	26.1	7.8	3.4	1.5
Cooperation with co-workers	25.6	45.2	22.5	4.2	1.4	1.0
Cooperation with management	27.2	43.5	21.7	5.2	1.9	.6

In terms of current performance statewide of vocationally prepared individuals relative to actual job expectations, eleven factors were considered. Vocationally prepared individuals generally were considered to be performing at or above the expected level. The percent of responses indicating the employee performed below expected or satisfactory level ranged from 4.0% for "compliance with policies, rules, and practices" to 8.2% for "ability to work with minimal supervision."

The results for those employees who were trained in secondary schools are shown in Table 3, page 9, and in Table 4, page 10 for merged area schools.

Employees trained for secondary schools and merged area schools were rated on preparation for employment including technical knowledge, work attitude, work quality, and overall preparation. Secondary schools were considered favorable ("good" to "very good") in technical knowledge by 77.3% of the ratings. Area schools received 77.2% favorable ratings for this factor. For work attitude, favorable ratings ranged from 18.3% for secondary school trained employees compared to 75.9% for area school trained employees. Work quality rated favorable for 78.9% of secondary school employees with merged area schools receiving 75.9% favorable ratings. Overall employees were considered to be prepared from "good" to "very good" by 77.8% of the ratings pertaining to secondary schools and 76.3% of the ratings of merged area schools. In general, both secondary schools and merged area schools received "good" to "very good" ratings on factors contributing to the overall preparation.

For "relative preparation of vocationally trained employees to non-vocationally trained employees," ratings concerning employees trained in secondary schools were categorized better prepared by 50.2% of the responses compared to 44.9% for employees trained in area schools. For secondary schools, 2.9% of the former students were considered less prepared than non-vocationally trained employees compared to 5.5% for merged area school former students.

For "current performance of vocationally trained individuals relative to actual job requirements," the range in percent of responses for secondary school trained employees under the category of less than satisfactory performance was from 4.3% for cooperation with co-workers to 11.5% for ability to work with minimal supervision. For merged area school trained employees the range was from 5.6% for "compliance with policies, rules, and practices" to 11.2% for "ability to work with minimal supervision."

Following the tables described above are more detailed presentations. Table 5, page 13, shows the statewide vocational training evaluation by demographic and program variables (C and D items from the questionnaire, see Appendix C). Tables 6 and 7 show these characteristics for secondary and merged area schools respectively.

Table 8, page 64, shows the distribution of responses according to sex of employees, number of months employed, and the present employment status by each program taxonomy number for secondary schools. It also displays the responses to the evaluation items (C and D) by program taxonomy number for secondary schools. Table 9, page 141, shows the same information for merged area schools.

July 5, 1979

Dear School Administrator:

As you may recall, about a year ago we requested from you a list of individuals who had completed a vocational preparatory program during the school year 1976-77. As noted at that time, the list of completers was to be used in an Employer Follow-up Survey. As a result of your cooperation, the survey was a success. The attached is a copy of the report of the Survey.

The report provides employer reactions to the job entry skills and current performance of the 1976-77 vocational education program completers. In addition to briefly discussing the purpose and methodology of the study, a descriptive analysis of the results and statewide tabulations are contained in the report.

If contacting your school resulted in obtaining tabulable data from employers (i.e., sufficient number of responses to insure confidentiality of information), you also will receive a copy of results pertaining to vocational programs which you provided for these 1976-77 program completers. Your specific results may be compared with the statewide results.

Will you please arrange for appropriate individuals in your school to receive this information.

A statewide summary of the survey is in the process of being published and will be distributed to schools in Iowa.

During the upcoming year, we plan to survey employers of fiscal year 1977-78 program leavers and completers. Your continued cooperation will be appreciated.

Sincerely,

Wm M. Baley

Wm. M. Baley, Associate Superintendent
Area Schools and Career Education Branch

Dear Colleague:

The Iowa State Department of Public Instruction plans to again survey employers of former high school and area school students who have either successfully completed or left vocational education programs for employment. Employers can provide information about characteristics of these graduates or former students at work which may be useful for improving vocational preparatory programs and for reporting about these programs.

We are planning to use a similar approach to the one used in last year's survey. We require the names of students completing or leaving preparatory programs between July 1, 1977 and June 30, 1978 and information on how and where to contact employers. Enclosed is a form designed to collect the needed information. This form is to be used to list by school name, vocational program name and taxonomy number, instructional level, program type, special emphasis, and object and purpose each student who completed or left a vocational education program during the 1977-78 school year and became employed in a training-related occupation. We are requesting that you list the name of each former student referred to above, program completion status, the employer name, employer address, and employer telephone number.

The identity of former students and their employers will be used only for collecting information and will remain confidential thereafter.

Please complete the enclosed form, and return by October 5, 1979.

If you have any questions concerning this project, do not hesitate to call Steve Boal, Career Education Division (515-281-4730).

Sincerely,

Wm M. Baley

Dear Colleague

Approximately one month ago we sent a letter to inform you of upcoming plans to survey employers of former high school and area school students who have either successfully completed or left vocational education programs for employment during 1977-78. These employers can provide information concerning characteristics of these graduates which may be useful for improving vocational preparatory programs and for reporting about these programs.

For this survey we require from each school the names of students completing or leaving vocational preparatory programs between July 1, 1977 and June 30, 1978, and information on how and where to contact employers for those former students who become employed in a training related occupation.

At the time of our initial contact with you, we requested that you list on the forms provided (sample enclosed) the name of each former student who completed or left a preparatory vocational education program between July 1, 1977 and June 30, 1978, and became employed in a training related occupation, the program completion status, the employer name, employer address, and employer telephone number. The form provided for this information is to be used to list the aforementioned information by school name, vocational program name and taxonomy number, instructional level, program type, special emphasis, and object and purpose.

Enclosed is a blank copy of the forms mailed to you previously. If you require additional forms or have any questions concerning this project, do not hesitate to call Steve Boal, Career Education Division (515-281-4730).

Since it is extremely important for us to ascertain the availability of this information, we are requesting that the form(s) be returned regardless of completeness. Please indicate, however, if the information is not available as well as any plans for making it available in the near future.

If you have recently responded to this request, please disregard this notification.

Sincerely

Wm M. Baley

William M. Baley, Associate Superintendent
Area Schools and Career Education Branch

Instructions for Completing
Employer Follow-up Roster Information Form (CE-20)

1. Verify that county, district, school number, and school name are correct on the form.

2. Complete the taxonomy number of the program that students completed or left during 1978-79. Also provide information concerning instructional level, type of program, special emphasis, and object and purpose. These codes should correspond to those used on the CE-4 Annual Application for program approval and reimbursement for FY 1979.

   Each time one of these codes change, use an additional form. If you need more forms onctact Department of Public Instruction or zerox from a blank form.

3. Enter the program name in the space provided.

4. List each student's name who completed or left in 1978-79 (between July 1, 1978 and June 30, 1979) the vocational program referred to at the top of the form and become employed in a training-related occupation.

5. Indicate the appropriate Job Title for each student in order for him/her to be considered as employed in a training-related occupation in the Guidance Service Student Follow-up Survey.

6. List the employer's name, address, and phone number corresponding to each student's name. (Employer by whom employed after training was terminated or completed.)

7. Total the number of students who completed or left vocational programs during 1978-79 and became employed in a training-related occupation. Enter the total in the space provided near the top half of the form.

8. Complete your name and the telephone number (area code, phone number) where you might be reached if clarifications are needed.

9. Return these forms to:

DEPARTMENT OF
PUBLIC INSTRUCTION

Attention: Manager or Personnel Director

Dear Employer:

The Iowa Department of Public Instruction is conducting this survey among firms which have employed persons who have received specialized training during the 1977-78 school year.

The purpose of the survey is to evaluate the strengths and weaknesses of the specialized educational programs offered by various Iowa high schools and merged area schools (community colleges). It is not an attempt to evaluate individual workers.

Central Surveys of Shenandoah, Iowa, has been retained to conduct and tabulate this survey. The enclosed form(s) should be completed by the person within your organization who has had the best opportunity to observe the employee designated on each form. A post-paid return envelope is enclosed for your convenience.

Your response, along with those of several thousand other employers, will be computer tabulated. The reports prepared will never identify an individual worker or employer. Answers will be grouped according to the type of vocational training program and the school providing the training. For this reason, it is important that the returns be as complete as possible.

This survey will help to strengthen the educational programs in Iowa, a potential benefit to all employers and to the state's economic health. Your cooperation is important and will be greatly appreciated.

We recognize and respect your right to privacy. It is protected by our pledge, and that of Central Surveys (who have dealt with confidential data for over 40 years), that your response will be treated with absolute confidentiality. In addition, we ask that you remove the perforated top portion of the questionnaire which contains the student name. After this is done, no unauthorized person could determine what individual was the subject of the questions.

If a student (employee is unknown, never worked for you, etc., a response to this effect will be very helpful and will spare both yourself and the survey agency the need for a repeat mailing.

If for any reason you have questions about completion of the questionnaire, please call Central Surveys at this toll free number: 1-800-432-9241 (out-of-state, call 1-712-246-1630 collect). A staff person will be available to answer your questions.

Thank you in advance for your help.

Sincerely yours,

Robert D. Benton

Robert D. Benton, Ed.D.
State Superintendent of Public Instruction

Please answer the following questions concerning vocational preparation.

Please detach here and return only the questionnaire

IOWA DEPARTMENT OF PUBLIC INSTRUCTION

EMPLOYER FOLLOW-UP SURVEY

A. EMPLOYEE INFORMATION:

FORM NO.:

1. Sex: Male___ Female___

2. Training Program in School:

3. Job Title:
   (a) Initial Job Title______________________________
   (b) Current Job Title (if still employed)______________________________

4. Number of months of total employment following completion of vocational training (A-2): ____________

5. Was this person employed in a task or position related to training in A-2?
   Yes___ No___

6. Present status with your firm: (Circle the appropriate letter)
   a - Currently employed b - Discharged c - Quit voluntarily
   d - Other______________________________

B. EMPLOYER INFORMATION:

1. Person Responding______________________________ Title________________
   Phone Number______________________________ Date________________

2. Number of permanent, full-time employees on payroll:____________

C. GENERAL REACTIONS - VOCATIONAL EDUCATION INFORMATION:

1. Vocational Training Evaluation

   Please rate the vocational training received by the individual in the following areas: (Circle one letter on each line)

	Very Good	Good	Neutral	Poor	Very Poor
(a) Technical knowledge	a	b	c	d	e
(b) Work attitude	a	b	c	d	e
(c) Work quality	a	b	c	d	e

2. Over-all Ratings

   What is your over-all rating of the vocational training received by this individual as it relates to the requirements of his or her job? (Circle one letter)

	Very Good	Good	Neutral	Poor	Very Poor
Over-all rating	a	b	c	d	e

3. Relative Preparation

   As a result of this person's vocational training, how would you rate his or her preparation in relation to other employees in his or her work group who did not receive such training? (Circle appropriate letter)

   a - No basis for comparison b - Individual is better prepared
   c - Both are about the same d - Individual is less prepared

D. RECENT EVALUATION:

Circle one letter on each line to indicate the level of performance the individual exhibits (or exhibited when terminated) for the respective competency or characteristic required by the job.

	Out-standing	Above Expected	Minimally Meets Expected	Below Expected	Unsatisfactory	Not Applicable
1. Quality of employee's work	a	b	c	d	e	f
2. Quantity of employee's work	a	b	c	d	e	f
3. Job skills - what worker must do (involves producing, servicing or repairing activities)	a	b	c	d	e	f
4. Technical knowledge - what worker must know (information necessary to form judgments in doing the work)	a	b	c	d	e	f
5. Work attendance	a	b	c	d	e	f
6. Punctuality	a	b	c	d	e	f
7. Compliance with other company policies, rules and practices	a	b	c	d	e	f
8. Willingness to accept responsibility	a	b	c	d	e	f
9. Ability to work with minimal supervision	a	b	c	d	e	f
10. Cooperation with co-workers	a	b	c	d	e	f
11. Cooperation with management	a	b	c	d	e	f

12. List any training-related strengths or weaknesses of this employee which now affect or have affected his or her performance:

STRENGTHS	WEAKNESSES
______________________	______________________
______________________	______________________
______________________	______________________

13. Other comments: ____

____

NOTE: This report is authorized by law (20 USC 2312 and 20 USC 2391). While you are not required to respond to this survey, your cooperation is needed to insure that the results of this effort are comprehensive, reliable, and timely.

THANK YOU
